

Christian Hospital Bissamcuttack

ANNUAL REPORT

1ST APRIL 2025--31ST MAY 2026

Our Core.

Christian hospital, Bissamcuttack is a multifocal institution, serving the poor and the marginalised.

CHB is a unique hospital in many ways. Our story starts from the year 1954, Dr. Lis Madsen, a dedicated doctor from Denmark, came to Bissamcuttack with a strong desire to serve people who had little or no access to healthcare. She started her work in a small clinic on the veranda of the local Lutheran Church. From these humble beginnings, Christian Hospital Bissamcuttack (CHB) has grown into a 200-bed multidisciplinary hospital, providing quality healthcare to the people of south-western Odisha.

At CHB, we are rooted in a threefold purpose: **Health, Education and Training.**

Healthcare: We provide specialised, affordable, and compassionate medical care through departments such as General Medicine, Paediatrics, Surgery, Obstetrics & Gynaecology, Anaesthesia, Dentistry, and Community Health. Our approach ensures that every patient—regardless of caste, creed, or background—is treated with dignity and care.

Education: Education is at the heart of our vision. Through the New Life English Medium School and MRSK Odia Medium School, we support the academic development of both local and tribal children—nurturing over 750 young minds annually and preparing them for a brighter future.

Training: Our College of Nursing offers GNM and B.Sc. Nursing programmes that prepare the next generation of healthcare professionals with strong clinical skills and a heart for service. In addition, our hospital provides on-the-ground training and mentoring opportunities for medical staff and students alike.

Our community outreach initiative, MITRA, takes this vision beyond hospital walls—reaching over 13,500 individuals in remote tribal villages with preventive care, maternal and child health services, and educational support. Today, Christian Hospital Bissamcuttack stands as a testament to a vision rooted in faith, compassion, and service. Whether through healing within our wards, nurturing young minds in our schools, or walking alongside communities in the remotest villages, we remain committed to transforming lives with dignity and hope. As we reflect on the work of the past year, we give thanks—for God's continued guidance, for the strength and perseverance of our team, and for the opportunity to serve.

Christian Hospital Bissamcuttack
Year in Review 2025-2026

Infrastructure

SN	Civil Work Repairs-Particulars
1	Boundary Wall of Chanchadaguda Land, Pump House, Pillars of Bondhuguda Building.
4	Renovation of canteen wall
5	Waiting Shed – Pediatric Ward, IP Pharmacy, A Section
8	MRSK- Girls Hostel- Toilet Renovation, Septic Tank Work
10	Ceiling Work – Mitra Sub-Center, MRSK Boys Hostel, CHB Staff Quarter,
13	NLEM Science Lab
15	Chapel Renovation is about to finish
16	Help Desk in OPD

Equipment

SN	Particulars	Brand/Description
1	New DG 320 KVA for Hospital	Cummin - Jackson
2	New DG for MRSK	Kirloskar
3	Up gradation of Modular and Aerator-STP	Customised
4	Video Laryngoscope	Flexicare Medical India
5	Online UPS	Exide
6	New SS Bed Side Trolleys	Customised
7	New ACs (Casualty, IP Pharmacy)	Lloyd
8	New Water Filter – A Section, B Section, OPD, CoN, Nurses Hostel)	
9	New Kitchen Set up – Doctors' Mess	
10	CCTV – OPD	CP Plus
11	New Server – Server Room	Lenovo
12	Endoscopy Unit	Olympus
13	New Ultrasound Unit	GE
15	Portable X-Ray Machine	GE
16	Central Suction Machine	Customised
18	Lab - Biochemistry Machine	Johnson & Johnson - Ortho Reagent Rental

Statutory Related

SN	Particulars	Status
1	10B & 12 AB	Received. Validity 2031-2032
2	ICU Inspection	Remark – Fire License Deficiency
3	Fire Inspection	Remark – Building Approval Deficiency
4	Pollution Inspection	Received – Validity Till March 2027
5	Started ESI	258 staffs enrolled
6	Hospital Land Converted into House purposes	Received Ghara Bari Patta in April 2026
7	Town Planning Building Approval is under Process	Under process – Pending in State Town Planning Office Odisha, Bhubaneswar

Staff Development

SN	
1	MBBS Doctors Retreat - 64 participants from Andhra and Telangana EMFI IMM Meeting -Before Internship -15 students
2	Staff Meeting - Alcohol Policy, POSH and CPP
3	Regular Inter Departmental Meeting
4	Staff Attended CMAI Conference – Regional and National
5	Fire Safety Training to the Staff
6	New Kitchen Set up – Doctors’ Mess

Christian Hospital Bissamcuttack

Report 2026

A		Out Patient Department	April 2025 - March 2026	April 2024 - March 2025	Difference
	1	Number of Working Days	307	309	-2

	2	Total Collection		834405	-834405

Healthcare

Entering the gates of the hospital, a patient may come in through one of three paths—Outpatient (OPD) or admitted (IPD) through Labour Room/Nursery, or Casualty. The patient's first point of contact upon entering the hospital OPD is the Medical Records Department (MRD), where essential details are recorded and a unique hospital identification card is generated to initiate their journey. This department functions under the capable leadership of Mr Kisan Kumar Bora, with dedicated support from Mr Ramesh Bhatra and Mr Ronit Pani.

Clinical Departments

Each of these departments form the core of the hospital, actively engaged in running OPDs, conducting ward rounds, and managing theatre procedures on a daily basis. Here is an introduction to each of our clinical departments. This year has been quite busy with growth and progress in every department.

DEPARTMENT OF MEDICINE

The Medicine Department handles the highest patient volume, led by Dr Pragya Jiwanmall (Deputy Medical Superintendent) and Dr Bobby Hudson. The team remains steadfast in providing life-saving and compassionate care, even as the number of critically ill patients grows. They are supported by a committed group of junior doctors: Drs. Ashish, Joshua, Hebrona, and Samuel Prince.

Critical care is further strengthened by Mr Miracle Suna and his team, who are responsible for managing the ICU cases. Their efforts are complemented in the wards by a skilled and dedicated nursing team, including Mrs Subhashini Mundu, Mrs Jyotsna Korada, Mrs Somani Bibhar, Mrs Kadambani Pradhan, Mrs Kastoori Kusulia, and others, to whom we extend our sincere gratitude.

DEPARTMENT OF PAEDIATRIC MEDICINE

The Paediatrics Department is efficiently managed under the leadership of Dr Lilly and Dr David M. Despite a significant rise in critically ill children, this dedicated team has admirably met the challenge. The department provides care for patients up to the age of 15 years. Paediatric Ward is managed by Mrs Alaka.

DEPARTMENT OF OBSTETRICS & GYNAECOLOGY

The Department of Obstetrics and Gynaecology is led by Dr Keerti Pratyusha, Dr Sheela Sowmdarya, and Dr Dhanusha. The Labour Room is one of the busiest wards in the hospital, with doctors and nurses working diligently to ensure that every mother receives attentive and respectful care during childbirth. Many critically ill patients from surrounding areas are also referred to our labour room for specialised care. A total of 2,973 babies were delivered at CHB last year, an increase of 62 deliveries compared to the previous year. This represents an average of about 8 deliveries per day. Of the total deliveries, 1,304 were assisted or operative deliveries, including 959 Lower Segment Caesarean Sections (LSCS), 25 forceps deliveries, and 320 vacuum-assisted deliveries. The LSCS rate was 32% of all deliveries. As CHB is a referral centre for complicated obstetric cases from our district and Kalahandi district, this number of operative deliveries is expected, as we receive many high-risk and referred patients. The smooth functioning of the labour room and maternity ward is made possible by the dedicated efforts of Mrs Pranamita and Mrs Anita Lima, whose leadership and commitment are deeply appreciated.

DEPARTMENT OF SURGERY & DEPARTMENT OF ANAESTHESIA

The Department of Surgery is led by me- Dr Sunil Jiwanmall. I am ably supported by Dr Subhash Manohar and Dr Bishal, with assistance from junior doctors. Together, we work tirelessly to meet the challenges of delivering quality surgical care in a rural setting, consistently striving to minimise complications and improve patient outcomes. We now have a cystoscope which we are using for diagnostic purposes only, to begin with. We had a total number of 5104 surgeries and an average of 14 per day. The efficient functioning of the department is made possible by the dedicated efforts of Mrs Sarita Digal in the recovery room, Mr Bichitra Bagh, Mrs Reenate, and Mrs Anjusha in the operating theatre, and Mr Amit Korada in the surgical ward.

DEPARTMENT OF OPHTHALMOLOGY

The department has been run by Dr Hema Prabha Mohanty and assisted by our optometrist, Mr Sudan Pani, overseeing the delivery of basic ophthalmic care. Together, they provide essential services such as vision screening, refraction, and treatment of both medical and surgical of common eye conditions. Their consistent work has been a vital part of our outpatient care.

DENTAL DEPARTMENT

Under the committed leadership of Dr Sneha, the Dental Department has consistently provided excellent general dentistry care to patients in a rural context.

PHARMACY

The pharmacy is a vital component of CHB, consisting of the Central Pharmacy/ drug store, the OP Pharmacy and two IP Pharmacies. Mr. Suraj Khura, the head of the department has been managing the department very well with Mrs.Minakshi, Mr. William Avil Mohanandia and Mr. Sanjay Pani.

THE CASH COUNTER

The cash counters operates efficiently under the supervision of Mr Chandershekar Ray and his team. Only after consultation with a doctor in the OPD does the patient proceed to the cash counter to pay for registration, investigations, medicines, and other required services.

DIAGNOSTIC PROCEDURE SERVICES

Diagnostic procedure services form a vital component of patient care. The X-ray unit plays a key role in this area and is managed by Mr. Amikiran assisted by Mr Uday Mishal. Ultrasound services are overseen by the respective clinical department heads, while ECGs are efficiently conducted by Mr Sudan Pani.

To address the fast growing number of ANC Ultrasound scans including the PMMSY govt scans, we have bought a new machine totally dedicated to the ANC and Gynaecology Dept.

After many years, we were fortunate to acquire a new endoscope—generously sponsored by the MBBS Batch of 1989 from CMC Vellore. We are deeply grateful for their generous spirit and commitment to supporting the patients we serve. The endoscopy service is currently overseen by Dr Bobby Hudson, who has recently joined our team after completing his postgraduate training at CMC Vellore. He also underwent endoscopy skill training there for one month at the Gastroenterology department.

Spiritual & Clinical Support Services

CHAPLAINCY

At CHB, each day begins with a time of prayer—seeking God's guidance, strength, and grace for the work ahead. This shared moment as a family grounds us and reminds us of the deeper purpose behind our service. We are especially thankful to our chaplain, Rev. Bimal Samantray, who faithfully leads our morning devotions and Sunday chapel services. Beyond these gatherings, he offers prayerful support and counselling to patients, staff, and families in need.

ADMINISTRATIVE DEPARTMENT

The Administration and Finance Department, led by Mr Chandershekar Ray, continues to be managed with great efficiency. Ms Subhasini Kuldip and Mr Bikas Harpal handle the demanding responsibilities of accounting with precision and dedication. In parallel, Mr Prince T, our IT professional, has played a key role in implementing the hospital's digital software system, successfully guiding the transition from manual to digital operations. Together, their coordinated efforts have significantly strengthened the hospital's administrative and financial systems.

NURSING SERVICES

The Nursing Services represent the largest workforce within CHB's healthcare system. This dedicated team includes 30 ANMs, 104 GNMs, 15 BSc Nurses, 2 MSc Nurses, 33 Nurse Aides, 45 Cleaning Staff, and 10 Healthcare Assistants. Clinical operations are efficiently overseen by Mrs Manisha Nayak, our Nursing Superintendent, and Mrs Prabhasini Khosla, the Deputy Nursing Superintendent. To ensure quality care, newly appointed nurses undergo the PRAST training program, which equips them with the skills to manage patients independently and effectively. I extend heartfelt appreciation to our nursing staff, whose tireless service and compassion continue to uphold the values and mission of CHB, even amidst challenges in resources and manpower.

Technical & Safety Systems

MEDICAL EQUIPMENT & OXYGEN PLANT

Our biomedical equipment and two oxygen plants are vital in supporting hospital devices such as ventilators, BiPAP machines, multi-parameter monitors, suction machines, and more. This essential service is managed by Mr. NKSK Nayak.

BIOMEDICAL WASTE MANAGEMENT/STP AND FIRE SAFETY

The Biomedical Waste Management and Sewage Treatment Plant department, led by Dr. Subhash Manohar, Ms. Prativa Begum and Mr. Chitaranjan Mohanty efficiently manages the segregation, collection, and safe disposal of biomedical waste, ensuring compliance with national regulations and minimising environmental risks. Additionally, Mr. Mohanty is responsible for overseeing fire safety across the campus, including maintenance of fire extinguishers, alarms, hydrants, and emergency exits. Both the hospital and the College of Nursing hold separate fire safety certificates.

INTERNAL COMPLAINTS COMMITTEE

Three complaints under the Internal Complaints Committee (ICC) were received during the reporting period. All complaints were inquired into in accordance with the prescribed procedures and due process. Based on the findings of the inquiries, appropriate proceedings were undertaken, and all three cases have been disposed of. The respondents were issued strict warning letters and disciplinary action was taken in accordance with institutional policy, following consultation with the institution's legal advisor.

Infrastructure & Operations

GENERAL MAINTENANCE

Under the guidance of Mr Rabindra Singh, our Maintenance Coordinator, the team ensures the smooth operation of CHB's infrastructure—including electricity, water, carpentry, and masonry. With just three members, they consistently address issues promptly, helping maintain a safe and functional hospital environment.

CSSD & Laundry

Mrs Sarojini Dip and her CSSD team ensure the hospital maintains strict infection control by sterilising and preparing medical equipment. Their work plays a key role in our low infection rates.

Mr Gurunath Bibhar and the laundry team reliably supply clean linen and garments to all departments, supporting daily hospital operations.

TRANSPORT

Led by Mr Pradeep Pani, the transport team—alongside, Mr. Pradeep and Mr. Bikash— manages staff and student transport, medical supply delivery, and school buses for NLEM. Mr. Lula is responsible for the transport in the community department of the hospital.

The department is also responsible for ensuring the water supply from the bore well at Chanchalaguda to the hospital campus. During the summer months, water scarcity is a recurring challenge, often requiring the purchase of water from external sources. However, this year, due to improved yield from our own bore well, we were able to meet our water requirements without purchasing water from outside suppliers. To strengthen our water management system, a new vehicle was added for the transportation of water.

Welfare and Comfort

DHARAMSHALA

The Dharamshala was built to offer affordable accommodation for patients who travel from afar and cannot return home the same day and also serves patients needing overnight stays. Additionally, the dormitories accommodate young visitors and trainees to CHB. The facility is efficiently managed by retired CHB staff through an outsourced arrangement.

COOKING AREA FOR PATIENTS

The cooking area for patients' relatives fosters a sense of home and community and allows families to prepare affordable meals while also creating a space for connection and support among people from diverse backgrounds. This year efforts have been made to refurbish and maintain the space, ensuring it remains clean, functional, and welcoming for all who use it.

CRÈCHE

The Crèche was started to support staff by providing a safe space for their young children while they focused on work. It is cared for by Mrs. Pramodini Samantray, who looks after 17 children aged 2-4 years from staff quarters and the town.

Case Study 1 : OBGYN

Mrs Kabita Majhi aged 29years married for 10years , P2L1, housewife, belonging to middle class family, came to OPD on 25/04/2026 with:

-C/O Amenorrhea of 8-9 months with cyclical lower abdominal pain for 3-4 days every month & swelling an sensation of heaviness of lower part of abdomen which is growing slowly.

Her Menstrual history is Regular at an interval of 28-30days with normal flow initially f/b increased flow since 1year a/c dysmenorrhea.

No significant past history or contraceptive usage.

On general examination mild pallor with vitals and CVS & Respiratory system normal.

Per abdomen- mass of 24weeks size , globular,regular surface,firm,mobile,nontender is seen which correlates with PV examination.

On radiological examination – fibroid ? cervical which is lying in lower uterine segment & Haematocolpus above fibroid occupying uterine cavity seen.

Proceeded for surgical intervention with myomectomy(cervical fibroid of 15x10cm removed) with drainage of Haematocolpus about 150-200ml. postoperative recovery was uncomplicated with satisfactory wound healing & discharged in stable condition.

This is a rare case of cervical fibroid causing haematocolpus which had a good prognosis , done with minimal investigation

Dr K Dhanusha (gyn)

Case Study 2 : Paediatrics

DISTAL RENAL TUBULAR ACIDOSIS

A 3-year-7-month-old girl presented with 1-year swelling of the wrist and ankle, leg bowing, poor weight gain, and improper walking. She was more thirsty and passed urine more frequently. Her weight and height were below the 3rd centile. On examination, she had a rachitic rosary and widened wrists. Blood investigations showed metabolic acidosis with pH 7.09, HCO_3^- 13.8, chloride 118, anion gap 12, K^+ 3.4, urine pH 7, and ALP 652. X-ray of the wrists showed cupping and splaying suggestive of rickets. Based on the history, examination, and investigations, distal RTA (renal tubular acidosis) was suspected, and she was started on sodium bicarbonate and calcium supplementation. Over 3 months, her gait improved, and polyuria and polydipsia decreased. Repeat blood gas showed pH 7.24 and HCO_3^- 17.

Before

After

Case Study 3 : Surgery

SUCCESSFUL MANAGEMENT OF A RARE TRANSVERSE COLON VOLVULUS

A 55 year old gentleman presented to the emergency department with complaints of abdominal pain, progressive abdominal distension, constipation, and vomiting. On examination, he was tachypneic and was in shock. The abdomen was markedly distended with absent bowel sounds. Digital rectal examination revealed a roomy and empty rectum. Clinical evaluation and radiological imaging were suggestive of a large bowel obstruction.

Following initial resuscitation and preoperative stabilization, the patient was taken up for emergency exploratory laparotomy. Intra-operatively, a rare transverse colon volvulus was identified as the cause of the obstruction.

Transverse colon volvulus is an uncommon surgical emergency, which contributes to only a small fraction of colonic volvulus cases and carrying significant morbidity when diagnosis and treatment are delayed.

Considering the patient's critical clinical condition and the operative findings, resection of the affected segment of the transverse colon was performed, followed by creation of a double-barrel stoma. The postoperative period was uneventful, and the patient recovered satisfactorily with appropriate stoma care, nutritional support, and regular follow-up.

After optimization of his nutritional and general health status, the patient was readmitted electively for reversal of the stoma. A successful stoma reversal procedure was performed, restoring bowel continuity. The postoperative recovery was uncomplicated, with return of normal bowel function and satisfactory wound healing.

The patient was subsequently discharged in a stable condition. This case highlights the importance of early recognition, prompt surgical intervention, and staged management in achieving a successful outcome in a rare and potentially life-threatening surgical emergency.

Education & Training

CHB's has three key training arms: the **College of Nursing**, **New Life English Medium School** and the **Mitra-Community Health Department**.

The following are brief reports shared by each of these departments highlighting their work over the past year.

College of Nursing Annual Report – 2025-2026

With a grateful heart I submit this report for the year 2026 Admissions:

Admissions for the current academic year are yet to begin. This year, we were late in applying for the Renewal NOC for the 2026–27 academic year GNM course at the Odisha Nurses Midwives Registration Council, Bhubaneswar. We have appeal to Honourable High Court to allow us and on process. We are also awaiting the Government advertisement for admissions to the B Sc Nursing course. At present, the total student strength in our institution is 140. The number of JELC-sponsored candidates admitted so far is as follows:

Year	ANM	GNM	B Sc N
2019	1/10	3/20	6/20
2020	3/10	3/20	7/20
2021	NA	6/20	11/20
2022	NA	5/20	4/20
2023	NA	4/20	5/20
2024	NA	1/20	0/20
2025	NA	3/20	4/20
2026	NA	Not yet	Not Yet

Examinations and Results:

GNM: For the GNM course, this year all three batches achieved a 100% result. In the third year, two students secured the 12th rank in the MIBE Board, while in the second year one student secured the 14th rank.

Regarding B Sc Nursing students (2020–2024), the University results have been declared and all students successfully passed with First Class. The 2021–2025 batch completed their academic year on 31st January 2026, and Semester VII are currently ongoing. The 2022–2026 batch has had their Sem - II & Sem - III results declared & all passed and awaiting their Sem - IV results. Sem - V examinations have been scheduled for 19th and 25th June 2026. Other batches have also appeared for their examinations, and results are awaited. Under the Odisha University of Health Sciences (OUHS), certain examinations are yet to be scheduled.

Faculty Update:

We thank God that we continue to maintain full tutor strength. we remain blessed with a sufficient number of teaching personnel. The College currently has 22 faculty (18+4) including teaching and non-teaching.

Mrs. Priyanka Biswasi has resigned from her position after successfully completing her JELC service obligation at Christian Hospital, Bissamcuttack.

Our faculty contribute significantly as MIBE examiners, inspectors, and correction panel members, Evaluators, Trainer of Trainee for CHO for the Government of India under NHSRC New Delhi, Paper evaluation at different University level.

Mrs Shantilata Behera has completed her M Sc Nursing in Pediatric Nursing at CMC Vellore and rejoined our institution.

Mrs Bidyut Rasmi Dongri, has completed M Sc Nursing in Obstetrics & Gynecology at Biswas College of Nursing, Bhubaneswar and also rejoined our institution.

Mr. Stephen Rajkumar, M Sc Nursing in Mental Health Nursing at CMC Vellore, joined our institution as faculty in April 2026

Visitors/Inspections:

An inspection was conducted by the Odisha University of health Science Bhubaneswar team of 4 person to verify the feasibility of the college, hostel for the B Sc Nursing course on February 2026

The fire inspection was conducted by the DFO, Bhawanipatna, along with the local fire safety team from Bissamcuttack. This inspection ensures compliance with safety standards and preparedness measures within the institution, reinforcing the importance of maintaining a secure environment.

There were 8 M Sc Nursing students from KINS College of Nursing, KIIT University, Bhubaneswar, who came for Community Health Exposure in May for a period of three weeks.

There were 7 Post Basic Nursing students from the College of Nursing, CMC Vellore, who visited for one week to complete their secondary hospital exposure

Field visits/postings:

First-year GNM and B Sc Nursing students visited the District Water Purification Plant, Rayagada.

Third-year B Sc Nursing students visited the local market at Chatikona as part of their syllabus

GNM 2nd year and B Sc Nursing 3rd year students were posted at the Mental Health Institute, SCB Medical College & Hospital Cuttack for their psychiatric nursing clinical experience.

Final Year B Sc Nursing students were visited JK Papers Mills at J K Pur Rayagada to observe occupational health hazards and prevention.

Workshops/ meetings:

Our faculty and students actively participated in and contributed to a variety of academic and professional development events. We continue to attend workshops and be resource persons at different meetings and workshops in various places and with different institutions – including government.

Attendance to various sessions by faculty:

Early Recognition of Paediatric Illness (Virtual): attended by entire faculty

Workshop on Indian Constitution & Preamble: Attended by entire faculty

Transforming Library wing open source Software KOHA & D Spare: Ms Sanjukta Kilaka, Librarian was attended at Berhampur University.

Curriculum Meeting – MIBE, Nagpur (Virtual): Attended by entire faculty

Prevention of Sexual Harassment at Workplace: attended by entire faculty and students

One B Sc Nursing government quota student from the 2025–26 batch and one GNM student 2025-26 batch have dropped out of the college without prior intimation, citing personal reasons.

I extend my heartfelt thanks to Dr Sunil Jiwanmall, Medical Superintendent, and the administration of Christian Hospital Bissamcuttack for their unwavering support in the smooth functioning of the College of Nursing and the Nursing Department.

Above all, we give thanks to God Almighty for His steadfast faithfulness at every step. Truly, without His guiding hand, we could not have endured or managed the workload entrusted to us.

Respectfully submitted,

B Prativa

Principal College of Nursing

NLEM Annual Report – 2025-2026

Academic Session -2025-2026, started on 2nd of April 2025. This year we have 580 students all together from LKG to Std 10, out of which we have 265 Girls and 315 Boys. In our LKG this year we have 46 students, including 11 students from the Government under RTE.

Our finalists for the year 2025-26 performed very well in their ICSE Board Examinations. Out of 44 appeared 20 students got distinction, 12 students got first division, 7 got second division and 2 students got third division. I am really very happy to inform that Satyajit Hota became the topper of the batch with 94 % of Marks.

The School Prefects for the session 2025-2026 were installed ceremoniously on 26th of September 2025. Dr. Sunil Jiwanmall, the Medical Superintendent Christian Hospital Bissamcuttack and Dr. Pragya Jiwanmall, Deputy Medical Superintendent were the Chief Guest and Guest of Honour respectively for the Prefects Installation Ceremony.

Teachers Day Celebrations was organized by our students in a completely different manner to show their love, gratitude and respect to all the teachers.

Like every year this year too we have conducted various Literary and cultural competitions in connection with the Children's Day Celebrations. This year we have conducted almost all the competitions those are conducted at the CISCE Regional and National Level.

On 27th of July 2025 our school conducted the Zonal Level Sports and Athletic Meet at Sacred Heart School, Rayagada. Students from six districts participated. Our students performed very well. We got many prizes. Almost seven students were selected for the State Level Competitions but this year due to some unavoidable reason our students could not participate in the State Athletic Meet at Rourkela.

Like last academic year this academic year too our school has organized CISCE Fr. Hess Memorial Zonal Level Quiz Competition on 30th of July 2025. Only 10 teams from the Rayagada Zone participated in the senior and junior categories. I am so happy to inform all of you that our School got second in the junior categories.

On 23rd of August 2025 Two students from our school Satyajit Hota, Std -X and Soumya Ranjan Das, Std-X had participated the Regional Literary Competition held at Venketeswar international School, Bhubaneswar and performed very well.

We have conducted almost all sports and games events. We have successfully conducted the Inter house athletic competitions. This year we have conducted Inter house Football and Kho kho match for both Under 14 and Under 17 category. I am so happy to inform you that our under 14 and 17 Kho Kho team is almost ready to take part in the Zonal Level Competition in the month of June – July 2026.

we have successfully conducted Two Mid Semester and Two Semester Examinations of our school. The Annual Examination has been conducted successfully in the month of March 2026. Annual result was declared on 30th of March 2026.

CISCE has started a new initiative this academic year, the ACTIVE CISCE, Fitness Assessment for all students. This Test is mandatory for all our students. In this regard our PET, Mr. Sadasiba Hikaka had been sent to Rourkela for two days Training Program from the CISCE, New Delhi. Now he is a Master Trainer for the Rayagada Zone, which is consisting of six district. Recently we have conducted a Training program at Deepti Convent School Rayagada for Rayagada Zone PET Teachers.

Our children participated in various inter school competitions in connection with the Independence Day and Republic Day Celebrations, won maximum prizes and brought glory to the school. Our Parade Troup got 2nd Prize during the Independence Day Celebrations-2025 and 3rd Prize during the Republic Day Celebrations-2026

School has arranged one day Industrial and Study tour for our Std X students. They have been taken to Rayagada to visit different small scale industries such as Utensils Making industry, Biscuit, Bread, Cake, Mixture making industry, HP Gas filling station, etc... They too visited the Centurion University, Indoor Stadium and the Planetarium. Our student thoroughly enjoyed and got a very good exposure.

On 17th of January we successfully conducted the Talent Search Examination-2025-2026.

Mrs. Sanjukta Mohapatra and Miss Tapaswini Sahu have joined our New Life School as Physics and Chemistry Teachers respectively. Mr. Sadasiba Hikaka, our new PET too joined the school.

Teachers Training and Workshop was conducted on NEP and Class Room Management. A resource person from Delhi took very interactive and activity based sessions for our school teachers. School Library has been upgraded and organized properly. School is taking every possible steps to provide a very good environment to both students and teachers.

I am really thankful to the School Managing Committee for their timely support and guidance. At the same time I thank all our dear parents for your understanding and trust on us and thanks a lot for your cooperation.

Thank you all. Thank You very much.

Molaya Benya, Principal

MRSK Annual Report – 2025-2026

There were a total of 126 students (62 boys and 64 girls) in the last academic year with 10 staff (6 academic staff and 4 support staff). All the classroom and non classroom academic activities underwent as planned according to the school curriculum.

A long planned, New-initiative 'Mila Grambini Basa' (Child's Learning Place) pre-school education program was started at MRSK on 14th September 2025. The curriculum was designed by the teachers of MRSK and classes were planned on every Thursday and Sunday as a day school after discussion with the School Committee.

MITRA Annual Report – 2025-2026

The Mitra. Community Health program is presently working with 54 predominantly tribal communities consisting of about 14,500 population working under 3 major sectors of Health, Education and Youth.

MITRA HEALTH

The health program function in 3 clusters delivering services through separate cluster teams. The Dakulguda centre and Kachapaju centres are the two health centres in two of the clusters. The last year there were a total of 1149 village visits by the health care team from the clusters and supported 17,148 patient visits through various treatment measures.

The malaria control program happened as planned medicating the 119 nets in the community and screening of all the children at 10 schools during the Annual School Health program at each school along with general examination.

There were a total of 18 TB patients who were given care through treatment, followup and supplementary nutrition.

Each month nearly 570 under 3 years old children were followed up regarding their nutritional status. There were a total of 95 Nutritionally At Risk Children (NARC) who were supported with supplementary nutrition along with counselling and care.

The Non Communicable Disease Care program included screening of towards HTN, DM and Chronic Kidney Disease among 1531 members belonging to 21 villages. The participation by the CHB into EMUNAH study (a multicentric study to know the prevalence of Chronic Kidney Disease) done by Department of Nephrology & Community Health at CMC Vellore added support for the screening of these larger numbers. The inference states that the prevalence of HTN was 20% (143 out of 707) Diabetes 7% (49 out of 707) and CKD 0.7% (5 out of 707) among the age group of 18-45 years old.

MITRA EDUCATION & YOUTH

The Mitra education program supports the various government schools to improve the quality of education under the AQTE program (Adding Quality to Education) with the support of youth interns from the community. This is functional in 10 various primary and high schools benefited by 416 children. There were 15 youths from the community engaged as interns who were selected and engaged in various educational activities at the school along with monthly reviewing at MRSK. As a part of educational visit and capacity building there were 36 youths who were taken to various institutions for visit.

There were 9 Health Care Assistant interns from the community who were selected after receiving application and completed the course.

MITRA TRU (Training and Resource Unit)

There was a 3 day - Art & Science of Community Health workshop conducted from August 21st to 23rd with 23 participants from 8 different NGOs and 4 Health care institutions. Dr Johnny Oommen was involved in the program as a major resource person during the program.

There were 2 batches of OAS Officer Trainees from Gopabandhu Academy of Administration who were posted at CHB as part of their NGO attachment posting in the month of October and November 2025. There were a total of 17 Officer Trainees who participated in this program at CHB involving visiting and interacting with the various community members and stakeholders during each of their 4 to 5 days of visit.

CHB. MITRA - APF PROJECT:

The 3 year project with Azim Premji Foundation completed in the year 2023. There were multiple visits from the partners as a part of their regular visit and evaluation. The new proposal for 5 year duration from 2026-2023 was agreed upon starting from the month of January 2026.

In Conclusion...

As we bring this year's report to a close, and as I conclude my term in the lead-up to my retirement later this year, I am deeply grateful for the journey we have shared at Christian Hospital, Bissamcuttack starting from 1994 to now, 2025-2026.

This report reflects the unwavering commitment, compassion, and collaboration of our entire CHB family — from clinical teams and support services to education and training. It is a testimony not only of what we've achieved but of the spirit with which we serve.

Every milestone covered in these pages is the result of many hands and hearts working together, often quietly and behind the scenes. While not all contributions are named here, each one is valued, and I remain thankful to every individual who has played a part in making this year fruitful.

I extend my heartfelt thanks to our Church, the Jeypore Evangelical Lutheran Church (JELC), and the members of the General Body and Board of Management of the Christian Hospital, Bissamcuttack Society for their continued support, prayers, and trust. I am especially grateful to our Chairman, Dr. Mathews Chacko, for his leadership and encouragement throughout the year.

To my CHB family — your dedication has carried us through challenges and victories alike. The unity, humility, and strength we share are gifts I do not take for granted. May we continue to serve with compassion, integrity, and grace, walking forward in faith and purpose.

Dr. Sunil Chander Jiwanmall
Medical Superintendent
July 2026
